

THE CHAMPION CHRONICLE

VOLUME 12

CHAMPION, (Alberta) THURSDAY MAR. 5, 1931

NUMBER 41

Don't Miss Friday's Birthday Event

Preparations for the anniversary of the opening of the Community Hall are complete and present appearances are that there will be a big attendance. The mixed character of the program will provide everyone, regardless of their taste with entertainment. The best artists available will take part in this instance, and those whose taste runs to dancing will have the opportunity to their heart's content. Particular attention is being paid to the refreshments and it is hoped the entire audience will remain for this feature. You cannot make a mistake in insisting on being on hand on this occasion.

One hundred and fifty-one divorces were granted in Alberta in 1930.

The Alberta government will not abolish the supplementary revenue tax.

Housekeepers Enjoy Rest For Two Days

The dust storm on Tuesday afternoon instead of being set by the snow during Tuesday night, provided a fine mixture of snow and sand which the high wind on Wednesday hustled around the country in great shape. It is doubtful if any worse dust storm has been experienced here, that is for penetration and length of time it continued. Generally speaking a storm was in demand, but what was looked for was precipitation from the skies, not from summerfallow.

The Supreme Court of Canada will decide whether Dominion or Provincial governments have control of broadcasting on April 9th.

The petition against beer parlors will be scrutinized by the standing committee of the legislature on private bills.

Opportunity Presented To Connect Streets With Highway

The Department of Public Works has offered to incur half the cost of graveling the Village street from the National elevator to the highway to the east. The cost is estimated at \$1,200, which would leave the cost to the Village at \$600. It is understood the Municipal District of Harmony has the same offer in regard to the portion of the road lying south of the National elevator and between it and the highway. Despite the financial situation, which is highly unsatisfactory,

it would seem that considerable sacrifice is justified in having this work done at the present time when the government force is on the spot, as the opportunity may not occur again. This work would be highly beneficial to town and country, as half a mile of poor road separating the highway from the elevators, and at the same time leaving Champion sidetracked as far as the traffic on the main highway was concerned, would be far from satisfactory to anyone concerned.

One New Member In Harmony Council

The municipal elections on Saturday resulted in the return of E. L. Nowlin in Division 1 and W. A. Fitzpatrick, the retiring councillor in Division 5. The result of the poll was as follows:

Division 1—E. L. Nowlin, 26; D. McAulay, 21.

Division 5—W. A. Fitzpatrick, 36; Cecil B. Smith, 20. Dan McAulay has been a member of the council for many years and will be missed when the councillors assemble. This is the only change in the personnel, A. J. Miller having been elected by acclamation in Division 4.

Twenty Years Ago

From 1911 files the Carmanston reprints the following: Mar. 2nd—Mr. and Mrs. W. C. Fry returned this week from their extended honeymoon trip through the west.

Feb. 25th—The new Methodist church at Champion will be dedicated on Sunday next by Rev. E. Bishop of Nanton.

Special Sermons By Rev. P. Dawson

Put this in your bible for reference. Series of sermons on "Five Biblical Questions, March 8th, "Art Thou a King? March 15th, "What is Truth? March 22nd, "Whence Art Thou? March 29th, "Who Crucified Jesus?"

April 5th, "When is the Resurrection?" Do not miss one of these messages.

For Rent—Desirable residence in subdivision, possession at once. Enquiries to H. Cooper Champion.

Growed cities are blamed for an increase of 2,377 in convictions for indictable offences in 1929 over 1928.

Postoffice revenue was down over \$9,000,000 in Feb., 1931, as compared to Feb., 1930.

The deficit of the C.N.R. for 1930 will amount to approximately \$30,000,000.

A duty on fuel oil from the United States is sought by western mine owners.

A Royal commission will investigate the western grain trade. The grain exchange and the 100 per cent pool will be looked into.

From winter to summer is but a step, and in this part of Alberta takes from two to three hours, as witness the performance on Thursday.

Badminton Growing Fast In Popularity

The local team travelled over to Milo last Wednesday night, winning 146 points to Milo's 170. They sure have some real good players over there, but their two best went down to defeat against our own, A. Anderson and F. Watts. Those who made the trip were Starr, Ditto, Watts, Anderson, Farries and Campbell.

Practically 30 members are now enrolled and the making of a real club is now assured but we just must have 20 more. Adults \$1.00, school 50c.

Jack Purcell Canada's singles badminton champion says, "The reason for badminton's increase in popularity. 'It is a game which can be played with the maximum of keen enjoyment by both young and old. Players are brought together under very pleasant conditions and no matter what the calibre of the badminton is, good, clean, healthy and amusing exercise is provided which promotes a very sociable and friendly spirit among all those who play together."

Co-Operative Loans Under Criticism

Loans to co-operative societies have been under fire in the legislature during the week, and a rather unsatisfactory state of affairs in this connection has been brought to light. It would appear that these loans were easily acquired, with the result that many of them will be lost.

Stavely proved to be an unfortunate place for the activities of four youths from Calgary, who were picked up through a system of burglar alarms, while pilfering goods from stores. They're in the jail house now.

While quite a number of cars have been on the streets it is understood that it will be some days before traffic from the country will be generally resumed, many side roads being badly drifted.

There was a general exodus from town on Sunday, the weather and roads being wonderful. Calgary, Lethbridge and other points all had their quota of visitors from Champion.

Carl Steeves has moved his machine shop outfit from Travers to Champion and will carry on business in part of Otto Miller's building opposite the Champion garage.

New Council Holds First Meeting

The first meeting of the new council was held on Monday evening. G. A. Orr was elected mayor for the current year, H. Cooper was appointed secretary treasurer and C. H. Messenger auditor.

The Village assessment for 1930 was made valid for the current year, subject to the right of appeal within twenty days.

First, second and third readings were given to a bylaw to amend the bylaw relating to dogs. The bylaw now reads that the license will be \$2.00 for dogs and \$5.00 for a bitch. License tags will be on hand this week and all owners will be expected to procure tags prior to March 31st.

The matter of tax arrears was discussed and it was decided that vigorous action will be taken against all ratepayers who are in arrears for 1929 and prior years, if said arrears are not paid prior to March 31st.

Women's Institute Regular Meeting

The Women's Institute will meet at the home of Mrs. Alexander on Tuesday March 10th, promptly at 2:30 p.m. Mrs. A. L. Martin of Vulcan, Constituency Convener, will be the principal speaker for the afternoon. Roll Call—"Suggestions for Exhibit at Carmanston Agricultural Fair. Refreshment Convener, Mrs. J. T. Stephenson. All ladies welcome.

Card of Thanks

Mr. and Mrs. F. J. Clapp wish to thank the Ladies' Aid and Women's Institute for flowers and other kind friends for kindness shown during Mrs. Clapp's illness.

H. Johnson and Miss Leola are visitors in Calgary.

Dramatic Society Scores Big Success

The Reid Hill Dramatic Society are to be congratulated on the success of the production on Feb. 27th of their play for this season which is entitled "Mrs. Temple's Telegram."

The Reid Hill Community hall was filled to capacity by an enthusiastic audience whose evident appreciation must have been an inspiration to the players.

The cast was well chosen for the separate roles and the result was an evening of delightful entertainment.

Negotiations are at present under way to induce the society to repeat the play in the Champion hall at an early date.

Was March "In" Before Tuesday

March came in like a lamb, alright, if the first two days only are taken into consideration. Tuesday afternoon provided one of the worst dust storms experienced here for some time, while a snowfall on Tuesday night and Wednesday, together with a high wind gave us the first taste of winter we have had for a long time. The question is, how long does it take March to come in?

Prairie Sunsets Make Presentation

A pleasing feature of the regular evening service Sunday last was the presentation to the congregation of a pulpit lamp and two solid quarter-cut oak offering plates by the "Prairie Sunsets" a one-time C.G.I.T. group under the leadership of Mrs. R. I. Baker. The presentation was made by Miss C. Caldwell.

Navigation on the great lakes is expected to open by April 1st.

THURSDAY, Mar. 5, 1931

NOTES AND COMMENT.

Premier Brownlee says government services cannot be reduced, that expenses must go on just as though times were good. They evidently thought the same thing in Australia, and now they are talking about repudiation. Practically everyone in the country has been forced to get along with a great deal less than previously, but reduction in salaries would wreck the civil service. Why don't it wreck the C.P.R. and every other corporation in the country to retrench by every means in their power in periods of depression. If the big organizations do not get their executives in economizing they certainly get the rank and file, but evidently what is good business for everybody else does not apply to governments, for governments are notorious failures when it comes to business. It is possible to understand borrowing money for public works in times of depression, but to continue levying taxes with one hand and providing relief with the other for the same people does not sound reasonable outside the walls of the legislative buildings.

Canada now has to decide whether she will trade implements to Russia, accepting coal as part payment and gold for the balance. Opinions are very diverse in regard to doing business with Russia, but there is little doubt that if payment was offered all in gold that she would get the goods she wants. The part coal idea provides the excuse for refusing to trade.

Since the above was written an embargo has been placed on the importation of coal, pulp wood, lumber and other goods; it being asserted convict labor is employed in the production of such goods.

They are having a big time throwing eggs at communists in the northern part of the province. While there is an overproduction of eggs and any way of getting them off the market may be commendable, still they seem too good for the purpose, unless they are bad.

Manitoba seems to have even more extensive unemployment problems than we have in Alberta, to judge by statements made by the premier in the legislature. At the same time it is plenty bad enough here to suit the most fastidious.

According to Sir Henry Thornton of the Canadian National Railways, students from the middle third in their classes are the most successful in life. They are not brilliant enough to become professors, or dumb enough to have to work.—New Yorker.

A manufacturing genius is a man who makes a community just strong enough to hold together until the last instalment is paid.—Judge.

Owing to the decision of the Supreme Court in reference to the British Columbia marketing act, action in regard to a compulsory pool will be delayed in Saskatchewan. In the meantime the Saskatchewan pool is backing the campaign for a 100 per cent pool. It is certainly looking a little suspicious to see pool funds diverted to this purpose while the people who supplied the pool grain are receiving relief from the government, especially when a portion of the pool members would withdraw from that organization if they could. A lot of the demand for a compulsory pool has arisen from crop failure, and when farmers are desperate they will adopt supposed remedies, no matter how little their application to the situation may prove of benefit.

As will be noted by reference to an advertisement in this issue the municipal scales are offered for sale. Harmony is not the only municipal district to discover that what seemed like a general demand for some system of checking elevator weights was almost entirely imaginary on the part of the farmers. The local scales were never used enough to pay the inspection fees.

While work on the land is reported from several points in the province, farmers in this vicinity seem to have no desire to hurry on to the land before spring is definitely on hand, at least no operations have been brought to notice as yet.

The opportunity to secure pedigreed seed this year is so favorable that a general effort should be made to sow a portion of this crop with the best of seed. Freedom from weed seeds and trueness to type is guaranteed.

Recurring burglaries have led to the suggestion that a night watchman should be employed. This would provide one man with a job but would be rather expensive for the Village at large. The total of all the losses from this source in the last twelve years would not pay a night watchman for one year. The taxpayer is entitled to protection from marauders who break in and steal but the proposed remedy would be worse than the disease, for the public at large.

In a number of municipal districts it has been decided to cut out roadwork this year, with the exception of when it is needed to provide relief work. Caution is not altogether gone in the country, although it is absent in many high places.

Will Test Water For Iodine Content

Dr. O. J. Walker of the Department of Chemistry, University of Alberta is at present working on a project which will give an indication of the iodine content of water in various parts of Alberta.

Samples of water are being obtained from representative points all over the province, and these will be analysed for iodine. In taking the samples the source of supply (river, well or spring), the depth from which the water is taken, and the formation (sandstone, shale, limestone or clay) is being recorded with a view to ascertaining the iodine content of the different water horizons. This survey is being made with a view to correlating the lack of iodine in the water of certain districts, with the prevalence of goitre in both humans and animals in those districts.

Real Hard Times

In Arkansas

Referring to the situation in Arkansas, the hardest hit of the drought-stricken states, the Literary Digest says:

"It faces the land to hastening ill a prey, where men, women, and children have lived for days on turnips, herbs, and roots, and on nuts gathered in the woods."

Thousands of undernourished children are unable to attend school because they lack food and clothing, and many of those who do attend bring empty lunch-boxes and "study" during the lunch hour.

Thousands of heads of families have been forced to "sign up" with the Red Cross, each giving three references, in order to obtain the \$2.00 weekly allowance granted each family, plus fifty cents for each child, the maximum being \$4.50 per week.

Mules are dying of starvation, and the survivors are so weak they are unfit for work.

Meat is such a luxury that a rabbit, the swamps by a lucky hunter, is called a "Hoover hog."

For the tropics, special golf balls are used to stand up to the heat. Even in this country we have seen a golfer for his ball for a long time before hitting it.—Punch.

A Trial Will Convince!

Use Of Fertilizers Throughout Western Canada Would Greatly Increase Production

That the use of phosphatic fertilizers throughout Western Canada would increase the acreage yield and would lower the cost of production sufficiently to enable Canadian farmers to better compete with low grain prices on the world market, was the statement made at Moose Jaw by Dr. Ray Neildy, of the Consolidated Mining Conference of the Moose Jaw Agricultural Society, held in the Grand Hotel.

Dr. Neildy was explaining the results of experiments made throughout the prairie provinces during the past four years, to establish the feasibility of using phosphatic fertilizers in increasing the grain yield and promoting early maturity and to illustrate his points showed actual pictures of fields in the three provinces where the new fertilizer had been used successfully.

Thomas Yeare, president of the local agricultural society, presided over the dinner meeting, which was largely attended, while a short address was also given by J. C. Mitchell, Dahinda, former mayor of "wheat king," who told briefly of personal experience with the new phosphatic fertilizer, and his belief that it would be a practical boon to Western farmers.

In his opening remarks, Dr. Neildy stated that concentrated experimentation over a period of four years had proved conclusively that where a new fertilizer was drilled in with the grain at the time of seeding, it resulted in earlier maturity and more rapid growth of the plants, while the yield was increased appreciably. Over 400 Saskatchewan farmers had cooperated with the provincial department of agriculture in making experiments with the new fertilizer, he stated further, and it was proved that to be effective with grain crops, must be drilled in with the seed.

Showing slides, the speaker pointed out that not only would large tons of crops be avoided but the quality of the grain would be retained. The fertilizer had been used with effect on hay lands and various grain crops in the southern Alberta it had been used to advantage on sugar beet crops where it had increased the yield from two to seven tons per acre, and had slightly raised the sugar content, besides maturing the crop from five to seven days earlier than normally.

"So when we realize the interdependence of plant, nutritious soils and climatic relationships," he concluded. "We can better understand why the drilling in of small quantities of phosphate with our seed will bring about such remarkable increases in the yield of our crops and their earlier maturity."

Demand For Mutton

Doubside Market Is Increasing According To Latest Figures
In 1927, Canada's consumption of sheep and lamb stood at 6.09 pounds per capita per annum, and by 1930, this had increased to 7.10 pounds. This increase of one per cent, roughly, is seemingly small, but, as pointed out in a circular letter of the Canadian Co-Operative Wool Growers, Limited, it is really impressive. "With our present population of about ten million people the one pound increase represents 10,000,000 pounds or about 300,000 animals or eight per cent of our total sheep population."

Canadian Potatoes
The total potato production for Canada in 1929 amounted to 39,350,000 cwt., and the onion crop for the same year 590,600 cwt.

"You had been yesterday afternoon to go to see your doctor, and an hour afterwards I saw you in a cafe with a man, playing cards."

"That was my doctor," Hummel, Hamburg.

W. N. U. 1579

A New Food Product

Experiments Now Under Way To Manufacture Honey-Butter

One of the most interesting announcements in the field of agricultural research and endeavor comes in a recent account of experimental work now under way with the object of combining honey and butter into a food product called honey-butter. This work is now engaging several workers in dairy and honey research, and definite results have already been obtained in the direction of producing such a commodity.

The idea, which by the way is Canadian in its origin, is to bring to the market a product which will be used for sandwich and picnic purposes with very definite possibilities of becoming a standard household article. The term honey-butter certainly has a tasty sound about it if this is to be any criterion.

An interesting speculation in connection with this piece of work is in connection with the age old combination of milk and honey, as a description of lands of unusual fertility and verdure. Milk and honey have become symbolic of much that is good and of the value of nutrients has never been questioned. The combining of honey with the most famous product of milk should certainly give rise to a product of unusual food qualities.

From the standpoint of the beekeeping industry, the establishment of such a commodity should also lead to an increased consumption and wider markets. Honey-producers have been endeavoring for many years to get a wider recognition and use of honey as a food and the turning of a considerable portion of the surplus into the manufacture of honey-butter would probably mean more to this industry than many years of publicity.

We shall be watching with interest for the appearance of this food on the market and let us hope that it proves as palatable as the ingredients would indicate.

Story Of Lost Mine

Reported Discovery Of Gold and Platinum In Alberta Foothills
Has the lost "Leman mine" been rediscovered?

The reported discovery of gold and platinum in the Livingstone range in the Alberta foothills country just south of Turner Valley oil field, has revived the saga of the legendary "lost mine."

Told by old-timers of the district, the story is that a man by the name of Leman discovered a rich vein of gold mine somewhere west of Nanton in 1870. He was Leman, it was said by friends in Indiana.

Following the discovery Leman returned to Idaho to bring his wife and family to Alberta, but on the return journey all met death, either by Indian attack or drowning. White men could never locate the mine, and the Indians alone knew its secret.

Today with the report of a rich find the pioneers of the district recall the early day legend.

More than 100 claims have been staked in the area, which is 100 miles northwest of Lethbridge. After 13 years' search, two prospectors of Staveland, Alberta, made the discovery of the gold and platinum bearing veins, and acres have gone into the Livingstone region.

A Worth-While Invention

Written words may be sent over a telephone line by use of an attachment devised by German telephone engineers, who now are testing it. Should the listener have difficulty in understanding a spoken word he asks the speaker to spell it, and it appears before the listener in writing. German long distance lines are expected to first use the attachment.

Goat Raising In B.C.

Interest in goat raising continues at a high point in British Columbia. During last year five herds were entered in the record of performance test for goats, ten head having qualified. The highest test was made by a Nubian doe, "Brimley Roma," 290-owned by Harold G. Morson, of New Westminster, whose milk yield was 2,596 pounds and butter fat 132.4 pounds.

Insurance statistics show the life expectancy of a boy who lives in the country is seven years greater than that of the city boy.

DANCES WITH PRINCE OF WALES

Miss Betty Gardner, of Brockville, Ont., daughter of Mr. and Mrs. J. G. Gardner, who was the Prince of Wales' partner for four dances during his recent visit to Kingston, Jamaica, on his trip south to the Argentine. Miss Gardner's father is a director of the hotel at Kingston.

Where Four States Meet

Only One Spot Where Four Boundaries Touch Same Place

At one place in the United States it is possible to stand with the head of the right foot in one state, with the toe of the right foot in another, with the left heel in a third and the toe of the same shoe in a fourth state. This unique spot is where the boundaries of Colorado, Utah, Arizona and New Mexico meet. It is the only place in the country where four states meet at the same point.

The Soy Bean

Will Sow 20 Acres Of Land In Manitoba With Soy Bean As An Experiment

A special sub-committee of the Agricultural committee of the Winnipeg Board of Trade is arranging for the sowing of 20 acres of land with the soy bean, as an experiment. The oils and fats derived from the soy bean are used extensively in industry, while the residue makes a valuable feed for cattle. Hence the effort to produce the bean locally.

FASHION

No. 926—Practical Model. This style is designed in sizes 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46 and 48 inches bust measure. Size 36 requires 3 1/2 yards of 39-inch material with 3/4 yard of 39-inch contrasting.

No. 926—For Playtime. This style is designed in sizes 1, 2, 4 and 6 years. Size 4 requires 1 1/2 yards of 39-inch material.

Revolving Loan Plan To Aid Western Canada Farmers Is Outlined By C.P.R. President

A Contribution From Bees

Manitoba Gives Indications Of Becoming the Leading Producer In Canada

The busy little bee in his humble and humming way is contributing his part to the productive wealth of Canada.

Beekeeping has been advancing with great rapidity in the Dominion, and honey production has become an industry of no mean importance. It is only within recent years, however, that it has developed from being more or less of a hobby into a profitable adjunct to other lines of agricultural endeavour and in many cases is the chief source of revenue.

Prior to 1921, Ontario and Quebec were the only provinces producing a surplus of honey. This surplus found a ready market in the other parts of the Dominion, especially in Western Canada. At that time honey was produced on a comparatively small scale in the Maritime Provinces, in Manitoba, and in British Columbia, while in Saskatchewan and Alberta apiculture was not so far behind. Today the situation has greatly changed. Not only has production increased in the other provinces, but it has also made phenomenal gain in the Prairie Provinces, so much so that Manitoba now gives indications of becoming the leading producer of honey, for the Manitoba crop during the 1929 season was estimated to be 10,110,128 pounds.

Indications of the growth of beekeeping in Canada is convincingly given by the following figures of honey production in 1926, compared with those for 1920—In 1920 the total production was 13,769,649 pounds; in 1926 it had increased to 31,169,635 pounds. The most remarkable growth was in Manitoba, where the production rose from 3,522,512 pounds in 1920, to 10,110,128 in 1926. In Saskatchewan the production jumped from 215,000 to 1,575,900 pounds; in Saskatchewan from 170,287 to 682,551, and in Ontario from 5,000,000 to 12,000,000 pounds. Each of the other provinces scored an advance, but not so marked as that for the provinces mentioned.

The total value of the 1930 Canada honey crop is placed at nearly \$4,000,000.

New Egg Storage

Air Is Replaced By Carbon Dioxide Gas in New System

Gas storage—a new development in keeping eggs fresh until the market is ready to absorb them, is interestingly described in the current issue of the New Letter of the Dominion Dairy and Cold Storage Branch at Ottawa. Briefly described, the eggs packed in 15-dozen packages and sealed with "anaerobic" gas, are placed in a metal container known as an Autoclave. When these are placed in the storage compartment, the air within the Autoclave is pumped out and replaced by carbon dioxide gas. As a further precaution against the presence of oxygen in or near the eggs the air outside the container is also drawn off and replaced by CO₂. Theoretically, and it is proving true in practice, an egg stays fresh directly in proportion to the extent to which it contains CO₂, and the two bug-bears of cold storage, mould growth and fungi, can develop only in the presence of oxygen with a humidity of 85 degrees at temperatures of 33 degrees Fahrenheit or over. Owing to the absence of oxygen no mould growth takes place and the eggs come out of storage in a most attractive condition.

Thirsty For Music

"There may be many opinions as to Johanneseburg's taste in music," writes a correspondent of The Cape Argus, of Cape Town, "but there can be no doubt of its thirst for it. One can walk from end to end of the shopping centre of the city without ever being out of carol of one instrument or another. As often as they will hear them struggling one against the other in a duet of sound."

Double Stars

A considerable proportion of the stars which appear as single to the naked eye are in reality double stars, that is, two stars revolving around each other from a common centre of gravity. The secrets of these stars are gradually but surely being unraveled by the Dominion Observatory at Ottawa, and the Dominion Astrophysical Observatory at Victoria.

Czechoslovakia now has 350 football fields, and 1,345 tennis courts.

Proposals in connection with the organization and operation of the Dominion government's \$5,000,000 revolving loan fund in all Western Canada farmers were outlined by E. W. Beatty, K.C., president of the Canadian Pacific Railways. Mr. Beatty was first president of the idea, definitely announced by Premier R. B. Bennett at Regina, December 30.

The railway had offered two major suggestions for officials named to handle the fund, which has been placed in the hands of the newly-chartered Dominion Agricultural Credit Corporation. No burden of handling charges should be imposed on the farmer, he thought, and the safety of the investment must be assured.

"The policy must be operated in such a way," he said, "as not to impose a burden on the farmer in the matter of handling charges, interest, etc., but rather to provide him with greater stability in earning operations at the very minimum of cost. It must also insure the safety of the investment so far as the capital of the loan corporation is not impaired."

He reiterated his belief, first declared at London, Ont., last December, that the plan would "improve conditions under which farm operations are carried on in those districts where their credits can be properly used."

In some paragraphs, Mr. Beatty thought, the credit body should function similarly to administrators of the "Minnesota plan." He thought it "might be advisable" to adopt the United States minimum and maximum loan limits. This would set loan limits at \$200 to \$1,000. "However," he added, "I would not favor the granting of the maximum amount except under special circumstances."

Length of time for which the loans are made also might be adopted from the "Minnesota plan," the C.P.R. president said. Under the three-year plan, the farmer would pay back 30 per cent of his loan after the first year, 30 per cent after the second year, and the balance after the third year.

Mr. Beatty asserted the loan plan here would be operated under vastly different conditions than when it met with "anaerobic" gas in Minnesota. "It will be well to remember," he said, "that their record in the matter of repayment of loans has been achieved in the period when prices and other conditions were comparatively good, that they have a great advantage over this country in the matter of population and, therefore, of consumers, and that greater difficulty may be experienced under more adverse conditions."

"This," he added, "suggests the advisability of some conservation in the extension of credit to the farmer. Greater safety in the operation of the loan scheme would be achieved through numerous relative small loans, though he said it was not yet possible to estimate cost of managing the credit corporation. "It should be urged that all possible avenues be explored with a view to establishing credit facilities at a rate of interest not to exceed six per cent," said the C.P.R. president. He stressed that the plan is not expected to "work miracles" for the farmers.

The central idea of the plan should be to seek to develop in favorable communities on the basis of some diversification of industry. Under different conditions might include two to five cows, one or two sows, 25 to 100 hens and, wherever possible, 25 to 50 ewes per individual farm.

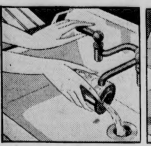

Because most of the people of China cannot afford to buy milk regularly it often is consumed as a medicine or tonic.

"Now you are rich, doctor you do not bother about your patients!" "You see, I have adopted the system of 'live and let live.'"—Gutierrez, Madrid.

GILLETT'S Fake Eye

cleans the bathroom
in half the usual time

Full strength for Sink Drains

Full strength for the toilet bowl

Insolution for general cleaning

GILLETT'S Lye "Eats Dirt"

* Lye should never be
dissolved in hot water.

ONE tablespoonful of Gillett's Lye dissolved in a gallon of cold water provides an ideal, safe solution that quickly cleans everything in the bath-room.

Use it to wash walls, the floor, in the sink and bathtub . . . and remember, when you use Gillett's Lye, each is disinfected as well as cleaned with the one operation.

Once each week, pour full strength Gillett's Lye down the closet bowl and it will always be clean and free-running.

Gillett's Lye has dozens of other handy household uses. Send for the new FREE Gillett's Lye booklet describing the many ways it will help you with all your cleaning.

CHAPTER XII

I'll tell you about it now, Gay, if you'll listen."

It was three weeks later. Nick, dressed for the first time, lay in a lounging chair on the porch, while Gay sat beside him, her usually busy hands idle in her lap—her eyes on the babies at play in the sand pile beneath the trees.

"Sure you feel like talking?" she questioned.

"I'll explode if I don't talk! The way you've bullied me into keeping my mouth shut when there's so much to say, and you must have been thinking such abominable things of me . . ."

Gay laughed.

"I never thought anything abominable at all—that is," she added honestly, "after the first minute when Julie told me that you and Mrs. Halliday had gone alone."

"What did you think then, Gay?"

She reached for his hand, as if in statement for her disloyalty.

"For just a second, Nick, I wondered if you'd deceived me. And then I was ashamed, horribly ashamed to have had such a thought. I knew all at once that there was some mistake—something you'd explain when you got home. Even when the whole night passed without your not disturbing you, I told Mr. Halliday that no harm would come to his wife through you."

"Nick kissed her hand. His voice was husky when he said: "I wonder how many wives would give me the benefit of the doubt at such a time."

"But there was no doubt, Nick, af-

ter that first moment. Would you have doubted me?"

He smiled.

"My dear, I wouldn't doubt you if you were gone a week! But that's different. Look here! I want to tell you everything. Of course I didn't misrepresent things, Gay. It was just as I said over the phone. Halliday went to Boston Friday morning, and that afternoon his wife called me up at the bank and asked if I'd dine there, she didn't say he was away, but I suppose I'd have gone in any case. The idea of needing a chaperone didn't strike me. It doesn't yet. If Halliday were alone and you asked him to dine some night when I was out, do you suppose I'd mind? Her Gay sat beside him, her usually busy hands idle in her lap—her eyes on the babies at play in the sand pile beneath the trees."

"Sure you feel like talking?" she questioned.

"I'll explode if I don't talk! The way you've bullied me into keeping my mouth shut when there's so much to say, and you must have been thinking such abominable things of me . . ."

Little Helps For This Week

"It is that no rule over his own spirit like a city that is broken down and without walls."—Proverbs xv, 28.

Real glory
Springs from the quiet conquest of self. Behold what the conqueror is! But the brave alone.

Rest not in an ovation, but in a triumph over thy passions. Let anger hang hanging down the head; let malice go manacled and envy fettered after thee. Behold what the true of the whole train of thy trophies, not without thee. Chain up the unruly legion of thy passions, and let them be thy captives, and be Caesar within thyself."—Sir Thomas Browne.

Wagner Festival

Toscanini Will Conduct Performances Of Tannhauser At Bayreuth

Toscanini, Furtwängler and Elmdorff will be conductors at this year's Wagner Festival to be held at Bayreuth. This will be the second year in succession that this honour has been to Toscanini.

Born in Parma, Italy, in 1867, Arturo Toscanini has had a brilliant musical career. He received his early training at Milan Conservatory and in the year 1908 was appointed to the directorship of the Metropolitan Opera House in New York, which position he retained until 1931.

To the thousands who attended the festival last year his conducting was a revelation and completely vindicated the faith of those responsible for the breaking of the tradition that only a German was capable of interpreting Wagner.

Boris Hambourg, of that famous Canadian quartette known as the Hart House Quartette, all of whom attended the festival, described the conducting of Toscanini as being nothing short of marvellous. In his interview on his arrival at Montreal on the Cunard liner "Acaena," after the festival, Hambourg had much to say of the highest praise for the Italian conductor.

Arturo Toscanini will, this year, conduct all performances of Tannhauser on July 21st and August 1st, 5th, 8th and 17th. He will also conduct "Parsifal" on July 22nd and August 6th, 9th and 19th. It was originally intended that Dr. Muck would conduct "Parsifal," but owing to a very serious illness has been compelled to withdraw. Dr. Muck is a musician who has been brought up in an atmosphere literally steeped in the Wagner tradition, and it was with great regret that he had to discontinue his Bayreuth activities.

This year Herr Furtwängler will be musical director-general of the Bayreuth Festival Plays, and will conduct "Tristan" himself. Carl Elmdorff will again be the conductor of the "Ring of the Nibelung."

Convenient sailings can be arranged via the Cunard Line for those wishing to attend the festival and last Friday during July and August there will be two Cunard-Anchord-Donaldson liners sailing from Montreal for Great Britain and the Continent.

Strange Himalayan Race

High in the Himalayan Mountains there is a mysterious tribe of people living in caves and having no contact with civilization. Little is known about them except that they are, according to the inscriptions on their caves, of Chaldean origin. Their years are nine months long, and many of the members of the tribe are 150 years' old.

The ADVENTURES OF CAPTAIN JIMMY and his Dog SCOTTIE

Well, boys and girls, so many stories have happened to us while flying about the world during the last few months that we just have to tell you the story of our adventures. Some of them perhaps you'll ever get a chance to see, and some of them will be so interesting that you'll want to read them all.

One of the things that happened to us was that we went to a place called "The Adventures of Captain Jimmy and his Dog Scottie." It was a very interesting place, and we had a lot of fun there.

FARM PARTY'S ASSURED FOR SASKATCHEWAN

Saskatoon, Sask.—Saskatchewan is assured of a new Farm Party, by a virtually unanimous decision, United Farmers of Canada (Saskatchewan Section), decided to enter politics. They will seek backing of all citizens in electing candidates on a policy aimed at ultimate social ownership and non-profit production.

Local autonomy was agreed on as a basis of the political move. Constituency conventions will be called when requested by 15 per cent. of U.F.C. local lodges in the constituency to be represented by two constituency-committee members, and the elected member or the candidate and the U.F.C. executive to attend.

Efforts of the new party, whose date of inauguration by convention is at least two months distant, will be directed into provincial and Dominion fields. The step places Saskatchewan, largest wheat producing Dominion, alongside Alberta in politico-agrarian organization. The Saskatchewan body claims 26,000 members as compared to 100 for United Farmers of Alberta. Manitoba farm-unit is a non-partisan body. It is necessary, however, after inauguration of the movement, to receive ratification from local lodges for a constitutional change removing the U.F.C. economic policy from the party's political alliances. This would take some 60 days.

Platform of the new party will be based on the U.F.C. economic policy approved at the four-day annual convention's second session recently. It includes demands for 100-per-cent grain pricing; "pegged" provincial government price-fixing board; nationalization of currency, credit and natural resources; and province-wide crop insurance.

In addition, the policy program included demands for Dominion and provincial social ownership of mines. It asked completion and operation of port and elevator facilities at Churchill by next September. Legislation to make a Churchill free port of entry for all goods, and freight and express rate cuts.

Delegates in favoring political action, would from the U.F.C. board all stipulation that formation of the new party occur at the refusal of Dominion provincial administration to put the new-formed economic policy into effect.

The convention's stand is a reversal of the decision at the 1930 meet, when political action was turned down by eight votes and formation of a political party outside the U.F.C. was favored. Officials claim that of three candidates in the last Dominion election pledged to back U.F.C. candidates, two were elected—Milton Campbell (Mackenzie), and A. M. Carmichael (Kinsler), both Progressives.

It is considered unlikely that George H. Williams, immediate past president of the U.F.C., will seek the leadership of the farm party if it is formed before spring. He is understood to believe that A. J. MacAulay, elected president of the U.F.C. today, should rather be a candidate for the position.

Backed by Williams, MacAulay was named leader on constitutional grounds, though almost all delegates favored Williams remaining in office beyond his expired two-year term, limit under the constitution. MacAulay, formerly vice-president, maintains a large grain and stock farm at Waseca, Sask. Williams is expected to be a candidate for the presidency at the next convention.

J. F. Herman, Rocanville, was elected vice-president.

Increase in Autos

Ottawa, Ont.—Canada had a motor vehicle for every eight persons in 1930, as compared with one motor vehicle for every 11 people in 1929, according to a report issued by the Dominion Bureau of Statistics recently. The number of motor cars registered in 1930 was 1,239,880, an increase of 44,295 over the previous year.

Clothing For Noddy Families

Ottawa, Ont.—Twenty-one families in the Adams, Sask., district have been provided with warm clothing through the efforts of the employees of the department of labor here. The bales, which contained 365 articles of clothing, was sent west a few days ago and word has been received here of its distribution among needy persons of the district.

W. N. U. 1870

Northern Trade Route

Insurance Rates To Be Lower Than Expected Out Of Hudson Bay

Ottawa, Ont.—Within the past three weeks there has been a sudden and in many ways completely unexpected interest on the part of Canadian, British and foreign shipping companies in the Hudson Bay route.

Mr. H. J. Maclean, Minister of Railways and Canals, declined to discuss these recent developments. He will make a detail statement in parliament, by which time it seems certain that definite plans and commitments will have been reached which will assure Fort Churchill a striking opening, and ensure the future success of the new trade route.

It is learned authoritatively that several large steamship companies have come forward and declared their intention of placing ships on the new route. The appeal to British and foreign shipping. There has been a most remarkable response among Canadian ship operators, who see tremendous possibilities in the development of inter-provincial trade. Maritime provinces companies are going to try to compete with the English and the prairie provinces. British Columbia companies already have completed a route for trade in lumber, with cargoes of wheat, outgoing from Churchill to foreign ports, and a return cargo from foreign ports to Vancouver.

These shipping interests have taken a firm hand in matters of insurance and cargo rates. Lloyd's of London, which has been stirred up and it may be assumed definitely that the insurance rates out of Churchill will be much lower than hitherto has been expected.

Important Ruling By

Alberta Supreme Court

Collection Of Fees Under Dominion Charter Is Illegal

Calgary, Alberta.—Fees assessed by the Lieutenant-Governor-in-Council on persons applying for a Dominion charter cannot be collected, according to judgment of the appellate division of the Supreme Court of Alberta. The court's decision was in an action taken by the attorney-general of Alberta against the Royalty Oil Company for collection of a fee imposed by the provincial government through the Lieutenant-Governor-in-Council and under the Alberta Companies Act.

To Oblige the Prince

Revolt In Peru Is Held Off Until Departure Of His Royal Highness

Vina Del Mar, Chile.—Reliable reports coming here from Peru declare that the revolt in that country was ready to start at the time the Prince of Wales visited Peru only a few days ago, but was held off until the British party had safely left. The persons who gave the information for the revolt were a party through Peru and Bolivia. They said that while the Prince of Wales was in Peru a number of officers, who said a revolution was impending, went to the Prince and told him that they would hold it off until he had completed his visit.

Well-Known Geologist Dead

Dr. Robert Stewart, Of Toronto, Had Stirling Career

Toronto, Ont.—Dr. Robert Stewart, well-known geologist and medical practitioner, and an authority on mining in the Hudson Bay district, died here last week.

Dr. Stewart was associated with the Hudson Bay Company and the Ontario Bureau of Mines. Dr. Stewart had a stirring career, being twice shipwrecked on Hudson Bay while once in the Bay of Ungava, in 1925, and once off the coast of Labrador, in 1927. His last trip to the North was made in 1928. Dr. Stewart was born in Lucknow, Ontario.

Unemployed Make Trouble

Girl and Two Policemen Injured In Toronto

Toronto, Ont.—Two policemen, a ten-year-old girl and a woman were injured when at least 2,000 of Toronto's unemployed gathered at the corner of Spadina Avenue and Dundas Street, in the downtown section, where a proposed demonstration was to be held. Seven demonstrators were arrested when stones, bricks, and other missiles were directed at the police, who retaliated by a charge along the thoroughfare.

RUSSIA WOULD TRADE COAL FOR FARM MACHINERY

Montreal.—If Canada will accept \$35,000,000 worth of Russian coal in part payment, Russia is willing to purchase her agricultural machinery, the total value of which will amount to \$10,000,000, according to a plan which Lieut-Colonel Herbert J. Mackie, former Conservative member of parliament, stated he had laid before the government at Ottawa, on behalf of the Soviet Government. The balance of the debt would be settled in gold, and the Soviet Government is understood to have expressed its willingness to hold a conference with Canada at which some plan would be formulated for marketing of wheat without dumping.

In the opinion of Col. Mackie, none understanding with Russia about the marketing of wheat is expedient. Anticipating the success of the five-year plan and casting an eye on Russia's wheat production growing up to this time, he seemed impressed with the strength of her position. He feared that some agreement would be reached with Russia she would undersell Canadians in every market of the world.

As for the opposition against importing Russian coal, Col. Mackie believed that the strongest propaganda had been emanating from American companies of the Soviet Russia's purpose is to export anthracite in domestic sales, a product which could not possibly compete with coal from Nova Scotia. The Russian coal would be in direct competition with the imported American product. Col. Mackie said.

"Canada and Russia must get together on this—we must have a conference," said Lieut-Col. Mackie.

"As things are, we had fair to involve Russia. At a conference in London, England, with a Canadian trade representative, Saul Bron, the chief Soviet trade delegate to the British Empire, reiterated this plea and this warning: 'Do not put Russia on the defensive.' He said it again and again, earnestly, pleadingly."

"I know the seriousness of Bron's statement, possibly better than any other Canadian, for I have made 17 visits to Russia since the revolution, and I know Russia's power to help or hurt my country," to wage economic war or peace.

"High Russian officials have approached Canada with me, asking for a conference. The idea receives the support of the Argentine and Australian government representatives in London, England. Only a few days ago Chairman Lugg, of the U.S. Farm Board, said that he could see value, with nothing to lose, in such a conference with Russia."

ROYAL BROTHERS AT GOLF

Vinny, Alberts.—Leo Chapui, farmer of this district, is taking his easy days these days. Not for him is the worry of boiling water for which to brew his favorite cup of tea, for shaving water or the long-drawn-out waiting ships will be a paramount necessity for the elevator at the port.

More than 200,000 bushels daily may pour through the varied port of the Churchill elevator. The warehouse when work is completed in the middle of next September. Only the great Pool Elevator. They will start the last six-month job on a job that is to give the northern harbor a 2,500,000-bushel grain elevator, the largest largest warehouse in the world.

Working men mean but little to the storages his ranged along the wharves of the rocky harbor at the end of the Hudson Bay Railway. But ability to handle grain—to dump cars to clean, weigh and separate the grain, to run it out, to waiting ships will be a paramount necessity for the elevator at the port.

They will start the last six-month job on a job that is to give the northern harbor a 2,500,000-bushel grain elevator, the largest largest warehouse in the world.

Working men mean but little to the storages his ranged along the wharves of the rocky harbor at the end of the Hudson Bay Railway. But ability to handle grain—to dump cars to clean, weigh and separate the grain, to run it out, to waiting ships will be a paramount necessity for the elevator at the port.

More than 200,000 bushels daily may pour through the varied port of the Churchill elevator. The warehouse when work is completed in the middle of next September. Only the great Pool Elevator. They will start the last six-month job on a job that is to give the northern harbor a 2,500,000-bushel grain elevator, the largest largest warehouse in the world.

NOTABLE STATESMAN

Winipeg, Man.—A. J. MacAulay, one of the snow-swept trails of Northern Manitoba to settle the title of woman dog mushing champion of the world, with a side bet of \$10,000, promises to be one of the feature attractions of dog derby week at the Pas as a result of developments, announced by A. E. Warren, vice-president Canadian National Railway, patron of the northern classic. Early this winter Miss MacAulay, girl musher from McCall, Idaho, recognized as the leading musher in the western states, challenged Mrs. E. P. Ricker, of Poland Springs, Maine, to a 25-mile dog race for the mushing championship of the fair sex. She asked for a side bet of \$10,000 to be posted before the race. The contest would take place over a course here selected by the dog derby committee.

The dog derby committee of the Pas has received a wire from Mrs. Ricker accepting the challenge. Both women are expected to take part in the 2000 mile race from the Pas to Pin Flon and return starting March 20. Miss Ida Carriere, another woman musher, is also training over northern trails for the long race.

Three of the northland's most fearless mushers, St. Godard, Earl Segard, and "Smooty" Russell, left Winnipeg via Canadian National Railway for the Pas, Man., where they will whip their wild dogs into shape for the gruelling 2000-mile race.

CHAMPION CHATTER

Vol. 4 Thursday, Mar. 8, 1931 No. 11

Published in the interests of the People of Champion and Farmers of this vicinity. Editor: GEO. L. DUPUE, Editor.

HEARD THIS ONE?

Judge: What's your name?
Man: Smith.
Judge: Your occupation?
Smith: Locksmith.
Judge: Locksmith up.
J. Smith is on the mend in a Calgary hospital.

CORRECT!

Teacher: "Give me a sentence using the word 'pencil'."
Able: "It broke my braces my pencil come down."

Ray Warren gave his Mc-Arg tractor an overhaul after three years' use and reports the necessity of putting in new rings and spark plug. How's that!

Add fifteen ciphers to 5,885,556 and you have the number of tons of the earth weighs. You can appreciate this figure

"Good Equipment Makes a Good Farmer Better."

better, perhaps, by knowing that the earth weighs as much more than the Leviathan weighs more than a dust particle.

A real friend is one who stands on your right hand when we are in the wrong.

We unloaded a car of Mc-Arg tractors on Tuesday. These conditions and prices make this kind of equipment more necessary than ever.

Radecliffe: A little puff would blow your dress away.
Princ: Yes, dear, it's a pipe organ.

You must not miss the second birthday party of the Community Hall on Friday.

It is a rare gift to know how to spend money to the best advantage.

If anyone would like the special of Tuesday's snow and send storm.

Profits are shaved when income taxes are filed.

CHAMPION
ALBERTA

Harry Smith shipped two cars of hogs on Thursday.
Mr. and Mrs. J. O. Bell entertained a number of friends to dinner on Thursday.

Arnold Planting, who is spending the winter at Adams, Oregon, expects to return to Champion about April 1st.

R. D. Farries and Andrew Anderson took in the final match between High River and Drumheller on Tuesday night.

Loretta Clever's tenth birthday was duly celebrated on Tuesday by a large number of her friends the party being highly enjoyable.

On Albert Hackett's sale bill a camping outfit, gasoline stove, folding table and four chairs, was omitted, and the item "Baby's Car Bed," should read Baby's Car Bed.

K. R. McLean, R.O., of McLean & Anderson, Sight Specialist 224-8th Ave West, Calgary will make his monthly visit to Champion Friday, March 27th, at the Drug Store.

Time-flies. On February 25th Geo. A. Hummel celebrated his fourth birthday. It will be but a short time until instead of Barney leading George by the hand, George will be doing the leading.

Farmers' Restaurant Re-Opened

I am again located in the Farmer's Restaurant and will be pleased to have all of my old friends and customers back again. We have completely overhauled the building and will be in a better position than ever before to serve you.
MRS. O. E. HARGREAVES.

Dr. H. NEWTON HEAL

Rev. Peter Dawson Minister
Sunday March 8th.
11 a.m. Church School.
11 a.m. Morning Worship at Blusson.

2:30 p.m. Church School at Sanderson.
3:15 p.m. Service at Sanderson.
7:30 p.m. Song Service.
1st in Series Subject—"Art Thou a King?"
Music by Choir.

Somehow, The Chronicle insisted on G. M. Campbell talking about potatoes whether he intended to or not in his advertisement, and the mixture of potatoes with what he was talking about didn't hitch worth a cent. However, "less said soonest mended."

Mr. and Mrs. Hargreaves have moved back to the Farmers' Restaurant building, which has been recently overhauled and is being refurbished and will continue its operation in the future. This restaurant was always popular with the public and will undoubtedly remain so on its revival.

The Chronicle

Local and General

Mr. and Mrs. Roy Luchia were visitors to Calgary last week.

Fred Alder reported harrows at work on his farm on Monday, March 2nd.

Born—On Thursday, February 26th, to Mr. and Mrs. Sam Beingsesser, a son.

Mrs. A. Hopkins is now in the Lethbridge hospital, where she is reported as doing well.

A Champion badminton team was forced to take the short end of a 170-147 score at Milo on Wednesday, Feb. 25th.

Whooping cough, which was very prevalent among the school children for the past two weeks, is disappearing.

G. F. Smith is at last making satisfactory progress towards complete restoration to health, after a siege of pneumonia.

If you want to draw a good laugh from a bootlegger, just tell him that drink is the cause of poverty—Louisville Times.

That was a mean trick to steal Horace Gill's watch. Now he is missing meals regularly owing to lack of knowledge as to just when they occur.

When a local badminton enthusiast found his socks were not darned and inquired the reason why he was crushed by the reply "Badminton."

The gravel on the new highway is now within a few miles from Champion, but is still being unloaded from Carman, where the loader is located.

Preparations for the anniversary of the Community Hall opening on Friday night are practically complete and a big time is assured for all who attend.

The overhauling of the Savoy hotel dining room is practically complete. For the present the hotel company will operate the dining room.

Rev. and Mrs. Dawson were away this week, the former attending the Presbytery at High River and Mrs. Dawson visiting relatives in Calgary.

Dr. and Mrs. Heal, Miss Ina Mae Hummon and Muller Roberts spent Sunday at the home of Mr. and Mrs. W. S. Ryan at Warner—Carmanway Sun.

Mrs. J. D. McDougall, who has been in the Holy Cross hospital, Calgary, for the past two weeks, is reported to be making satisfactory progress.

B. Lafontte has sold his poultry and ranch equipment and retired from the business. Charley certainly ran into a bad year for his effort along this line.

Jas. Smith's sale on Tuesday was well attended and despite the very high wind, which made things uncomfortable for everyone, the bulk of the offerings were sold at good prices. A Hopkins was the auctioneer.

Somehow, The Chronicle insisted on G. M. Campbell talking about potatoes whether he intended to or not in his advertisement, and the mixture of potatoes with what he was talking about didn't hitch worth a cent. However, "less said soonest mended."

Mr. and Mrs. Hargreaves have moved back to the Farmers' Restaurant building, which has been recently overhauled and is being refurbished and will continue its operation in the future. This restaurant was always popular with the public and will undoubtedly remain so on its revival.
